EBSCO Full-Text Companions to *MEDLINE* vs. Ovid's 4 Biomedical Collections

Database/Collection	Active Full-Text Journals with...				
	No Embargo	Embargo of 90 days or less	Embargo of 4 to 6 months	Embargo of 7 to 12 months	Embargo of 13 to 36 months
Ovid's 4 Biomedical Collections (merged & unduplicated)	59	0	0	0	0
EBSCO <i>MEDLINE</i> with Full Text	243	16	63	771	0

* NOTE: This excludes EBSCO's e-journal service (EJS) and Ovid's e-journal service (journals@ovid)

*Figures as of December 3, 2007

MEDLINE with Full Text includes many of the non-WK/AMA/BMA/OUP/Elsevier journals found in the Ovid Collections, including the following with NO embargo:

NOTE: All other journals found in the Ovid Collections are either available via EJS (the majority) or via the publisher's site (with links from EBSCOhost).

WK = Wolters Kluwer imprints (including Lippincott, Williams & Wilkins); AMA = American Medical Association; BMA = British Medical Association; OUP = Oxford University Press; Elsevier includes Harcourt, Mosby, Saunders, etc.

***MEDLINE with Full Text* provides full text for hundreds of journals not available via Ovid Collections or via journals@ovid, offering many with no embargo, including but not limited to:**

- *American Family Physician*
- *American Journal of Health Behavior*
- *American Surgeon*
- *Annals of Dyslexia*
- *Annals of Family Medicine*
- *Annals of Otology, Rhinology & Laryngology*
- *Annual Review of Sex Research*

- *Archives of Pathology & Laboratory Medicine*
- *Bulletin of the Menninger Clinic*
- *Canadian Association of Radiologists Journal*
- *Canadian Journal of Dietetic Practice & Research*
- *Canadian Journal of Psychiatry*

* NOTE: The overwhelming majority of journals@ovid customers do NOT buy all of the journals available in that service, therefore, many of those journals would be gained as well (by adding EBSCO databases)

***MEDLINE with Full Text* will contain
large PDF backfiles for many journals, including:**

<i>Addiction</i> (including former titles)	1972 to present
<i>Allergy</i>	1978 to present
<i>American Journal of Law & Medicine</i>	1975 to present
<i>American Journal of Public Health</i>	1973 to present
<i>Angiology</i>	1965 to present
<i>Annals of Internal Medicine</i>	1965 to present
<i>Archives of Environmental & Occupational Health</i> (including former titles)	1973 to present
<i>Australasian Journal of Dermatology</i>	1967 to present
<i>Clinical & Experimental Dermatology</i>	1976 to present
<i>Clinical & Experimental Immunology</i>	1966 to present
<i>Clinical Pediatrics</i>	1965 to present
<i>Immunology</i>	1965 to present
<i>Journal of Cutaneous Pathology</i>	1974 to present
<i>Journal of Investigative Dermatology</i>	1970 to present
<i>Kidney International</i>	1972 to present

EBSCO offers Linkout from PubMed to both Full-Text Databases and e-journals

The screenshot shows a Microsoft Internet Explorer browser window displaying the PubMed website. The address bar shows a URL for a linkout service. The page content includes the PubMed search interface with a search bar and various navigation options. A search result is displayed for the article "Pelvic desmoid tumor: threat to mother and fetus." by Firoozmand E, Prager E. The article is from Am Surg 2001 Dec;67(12):1213-5. The EBSCO HOST logo is visible next to the article title, indicating a linkout to the full-text version. The abstract text is visible below the title.

EBSCO HOST

Pelvic desmoid tumor: threat to mother and fetus.

Firoozmand E, Prager E.

Santa Barbara Cottage Hospital, California, USA.

Desmoid tumors (DTs) are well-recognized extracolonic manifestations of familial adenomatous polyposis. Surgical trauma and hormonal changes during pregnancy have been proposed as etiologic factors. We present a case of a rapidly growing pelvic DT arising from a J-pouch in a 27-year-old pregnant woman status postcolectomy with ileoanal J pouch anastomosis. The tumor interfered with the normal maturation and delivery of the fetus as well as the patient's ability to void or defecate prompting surgical intervention with resection of the tumor and adjacent J pouch at 23 weeks gestation. There are no other reports in the literature of pelvic DT requiring resection during pregnancy. Pelvic DTs in this scenario are potentially fatal to both mother and fetus secondary to uncontrolled bleeding. Surgical intervention should be limited to resection of tumor and when necessary the ileal pouch to minimize bleeding complications.
